## Christchurch Family Hub chooses Style once again

BCP Council

In 2003, Style was asked to install a folding wall with a pass door to enable the Christchurch Family Hub to divide its main activity and family room into two separate rooms, as and when needed.

22 years on and BCP Council, which operates the Hub, contacted Style once again to remove the old wall and replace it with a new, modern moveable wall with slicker operation and improved acoustics.

Working directly with BCP Council, Style installed a Dorma Huppe Variflex moveable wall in a beech laminate finish. Providing a 49dB acoustic barrier, the Variflex enables activities and gatherings to take place either side of the wall without disturbing one another.

"The original wall lasted over two decades because we have been providing Christchurch Family Hub with routine servicing and maintenance over the years to ensure its continued smooth operation and enhancing its lifespan," said Michael Porter, Style's group managing director.

"However, the centre felt that now was a good time to upgrade to a modern moveable wall and the Dorma Huppe Variflex brings with it the latest operational features, improved acoustics and it's also a far more sustainable option too."
