Moveable wall for law firm's offices in Milton Keynes

DENTONS

At Dentons' offices in Milton Keynes, Style worked with contractor, CBRE, to install an additional moveable wall to convert an existing corner moveable wall into a "T" configuration.

A Dorma Huppe Variflex glass moveable wall was installed with semi-automatic operation and a 52dB acoustic rating.

This new 'extension' increased the flexibility of the office space by giving Dentons the option to create an additional small meeting room, create a much bigger meeting area, or open up the entire floorspace for larger gatherings.

Offering seamless interior design, the frames of the new moveable wall were matched to those of the existing wall, with a continuation of the glass and a pass door for ease of access.

Michael Porter, Style's group managing director, said, "The high end acoustic rating of this Variflex moveable wall means meetings can take place in complete privacy, without noise disturbance, and the semi-automatic operation means the acoustic seals are applied to the correct pressure each time the wall is closed."
