Premier League

London

To create a highly flexible boardroom within its London headquarters, the Premier League selected a combination of Dorma Hüppe Variflex Glass and Variflex solid movable walls. Featuring semi-automatic operation, acoustic ratings of up to 57dB for the solid walls and 52dB for the glazed system, the installation enables the space to be quickly reconfigured into multiple meeting rooms or one large boardroom while maintaining excellent sound insulation, natural light and a premium contemporary finish.
